TURN IDEAS INTO IMPACT

09–10 October 2026

SSR Global Skills Park, Hazrat Nizamuddin Colony,
Sector B, Ayodhya Nagar, Bhopal

• VENUE PARTNER •

// ABOUT

The MPOnline Idea & Innovation Hackathon 2026 is a platform for young minds to transform ideas into practical solutions for Madhya Pradesh.

College students, graduates, and working professionals for both technical and non-tech will come together to identify real-world challenges, build innovative solutions, collaborate with mentors and pitch their ideas to an expert jury.

From AI and digital technology to education, governance and rural inclusion, the hackathon invites solutions that can create meaningful, scalable and measurable impact.

// WHY PARTICIPATE?

01

Solve Real Problems

Work on challenges that address education, technology, governance, rural access and public services.

02

Build Practical Solutions

Create prototypes, digital products, service models or implementation-ready ideas

03

Learn from Experts

Get guidance and feedback from industry professionals, domain experts and mentors.

04

Showcase Your Talent

Present your solution before an expert jury and compete for prizes and recognition.

05

Connect & Collaborate

Work with like-minded innovators, peers, mentors and future industry leaders

WHO CAN PARTICIPATE?

01 Young Professionals
aged 16–25 years

02 Students
from class 11th, 12th,
UG and PG courses

Team Size: 2–4 members

Solo participation is not permitted. Cross-department and cross-year teams are welcome.

A valid original ID (showcasing your DOB) should be carried throughout the event

// PRIZES & RECOGNITION

| Access to Future TEDx events

SIX CHALLENGES. ONE BIGGER MISSION

Choose a problem statement, develop your solution and demonstrate how your idea can create real-world impact.

01 | AI-Powered Career Readiness & Employability Platform

Domain

Artificial Intelligence | Higher Education | Skill Development | CareerTech

Background

Thousands of students graduate from colleges every year, but many lack awareness of industry expectations, career opportunities, internships, certifications, and suitable employment pathways. Institutions also struggle to provide personalized career guidance at scale.

A digital AI-powered platform can bridge the gap between campus learning and industry readiness by providing personalized career roadmaps

Challenge

Design an AI-enabled platform that can:

- » Analyse student profiles and academic records
- » Recommend career paths
- » Suggest skill gaps
- » Recommend online courses and certifications
- » Match internships and job opportunities
- » Generate AI-based resume improvements
- » Conduct mock interviews
- » Recommend government employment opportunities

Expected Outcome

A solution that improves employability and supports the vision of Campus to Corporate.

Alignment

- » NEP 2020, Skill India, Digital India, Viksit Bharat 2047

02 | Smart University Digital Campus

Domain

Digital Governance | Education ERP | AI | Automation

Background

Many colleges continue to operate fragmented systems for admissions, attendance, examinations, fee management, grievance handling, student services, and academic administration. Students often visit multiple offices for routine services.

Challenge

Design a unified Smart Campus platform capable of integrating:

- » Student lifecycle management
- » AI Chat Assistant
- » Digital Certificates
- » Hostel Management
- » Transport
- » Attendance
- » Timetable
- » Fee Payments
- » Student Helpdesk
- » Parent Portal
- » Mobile App

Include AI features such as:

- » Voice Assistant
- » Predictive student performance
- » Early dropout prediction
- » Personalized learning recommendations

Expected Outcome

A unified digital campus improving governance, transparency, and student experience.

Alignment

- » Digital Campus, Ease of Governance, Smart Universities, Viksit Bharat

// SIX CHALLENGES. ONE BIGGER MISSION

03 | AI-Driven Examination & On-Screen Marking Transformation

Domain

Assessment Technologies | AI | Examination Reforms

Background

Universities conduct large-scale examinations involving answer sheet evaluation, moderation, result preparation, and quality assurance. Traditional evaluation methods are time-consuming and prone to delays and inconsistencies.

Challenge

Develop innovative solutions to enhance **On-Screen Marking (OSM)** and digital evaluation by incorporating AI and analytics.

Possible features include:

- » AI-assisted answer evaluation support
- » Automated detection of unchecked answers or marking anomalies
- » Examiner performance analytics
- » Smart moderation workflows
- » Handwriting recognition assistance
- » AI-generated evaluation summaries
- » Real-time evaluation dashboards
- » Malpractice or unusual scoring pattern detection
- » Faster result processing
- » Mobile-enabled examiner interface

Expected Outcome

A scalable digital evaluation ecosystem that improves transparency, consistency, speed, and quality of university examinations.

Alignment

- » Examination Reforms, Digital Assessment, Academic Excellence, Digital India, Viksit Bharat 2047

04 | Digital Inclusion for Rural Higher Education

Domain

EdTech | AI | Inclusive Education

Background

Students from rural and tribal regions often face challenges such as:

- » Limited internet connectivity
- » Language barriers
- » Lack of career awareness
- » Limited access to quality educational resources

Challenge

Develop an innovative platform that enables inclusive digital learning through features such as:

- » Offline-first learning
- » Regional language support
- » AI-powered doubt resolution
- » Voice-based interaction
- » Low-bandwidth optimization
- » Government scholarship discovery
- » Digital mentoring
- » Career counseling

Expected Outcome

A solution that democratizes access to quality higher education across Madhya Pradesh.

Alignment

- » Inclusive Education, Digital India, Viksit Bharat, Sustainable Development Goals

// SIX CHALLENGES. ONE BIGGER MISSION

05 | AI Innovation for Public Services & Citizen-Centric Governance

Domain

GovTech | Artificial Intelligence | Digital Public Services

Background

Government departments increasingly require intelligent digital solutions that improve service delivery, reduce processing time, and enhance citizen experience.

Young innovators can contribute by designing AI-powered applications addressing real public challenges.

Challenge

Develop an AI-based solution that improves any public service related to:

- » Education
- » Scholarships
- » Recruitment
- » Citizen grievance redressal
- » Healthcare
- » Agriculture
- » Transport
- » Tourism
- » Urban governance
- » Rural development

Possible technologies include:

- » Generative AI, Voice Bots, Computer Vision, OCR
- Predictive Analytics, Conversational AI, Mobile Applications

Expected Outcome

Scalable, citizen-centric digital innovations that enhance governance and improve quality of life.

Alignment

- » Digital India, AI for All, Ease of Governance, Viksit Bharat 2047

06 | Resilient & Trustworthy Online Assessment Ecosystem

Domain

Online Assessment | EdTech | AI | Examination

Technology | Digital Governance

Background

Large-scale examinations and assessments are increasingly moving towards digital and online modes.

However, technical failures, operational challenges, security incidents, data inconsistencies, or other unforeseen disruptions can lead to examination delays, re-conduct of examinations, increased costs, and significant inconvenience to candidates. Such incidents can affect not only the examination process but also the confidence and trust of students and other stakeholders in the assessment system.

The challenge is to build a technology-driven assessment ecosystem that is reliable, transparent, secure, resilient, and capable of responding effectively to unexpected disruptions.

Challenge

- » Real-time monitoring of examination infrastructure and candidate sessions
- » Early detection and prediction of technical or operational failures
- » Automated incident detection, classification, and escalation
- » Backup and disaster-recovery mechanisms for examination continuity
- » Secure and tamper-evident storage of examination and response data
- » Intelligent identification of suspicious or abnormal examination patterns
- » Automated reconciliation and validation of candidate responses and examination data
- » Candidate communication and real-time status updates during disruptions

SIX CHALLENGES. ONE BIGGER MISSION

- » Intelligent decision support for determining whether an examination needs to be rescheduled or reconducted
- » Mechanisms to ensure fairness and consistency when an examination is disrupted
- » Post-examination audit trail and evidence-based reporting
- » AI-powered analytics to identify systemic risks and prevent recurrence

The solution should focus on “**Prevention → Detection → Response → Recovery → Trust**” across the complete assessment lifecycle.

Expected Outcome

A prototype or MVP demonstrating how technology and AI can make large-scale assessments:

- » **More reliable** – minimizing examination disruptions and downtime
- » **More resilient** – ensuring continuity or controlled recovery during unexpected events
- » **More secure** – protecting examination and candidate data
- » **More transparent** – providing clear evidence and audit trails
- » **More responsive** – enabling timely communication and decision-making
- » **More trustworthy** – maintaining candidate confidence in the assessment process

The proposed solution should ultimately help reduce examination disruptions and avoid unnecessary re-conduct of assessments, thereby saving time and resources while protecting the interests and confidence of candidates.

Alignment

- » **Digital India** – Strengthening technology-enabled public services
- » **NEP 2020** – Promoting technology-enabled and transparent assessment systems
- » **Viksit Bharat 2047** – Building reliable, scalable, and citizen-centric digital infrastructure
- » **Digital Education & Assessment** – Modernizing examination and evaluation processes
- » **Good Governance** – Improving transparency, accountability, and service reliability
- » **Trust in Digital Public Infrastructure** – Ensuring dependable and secure digital services for citizens

// CHOOSE YOUR TRACK

TECHNICAL TRACK

Build. Demo. Explain

Develop a working solution such as:

- » AI/ML Solutions
- » Mobile or web applications
- » Dashboards
- » Automation tools
- » Digital platforms
- » System prototypes

Teams should be prepared to demonstrate their solution and explain the technology, tools, data and implementation approach.

NON-TECHNICAL TRACK

Design. Validate. Present.

Develop:

- » Research-backed concepts
- » Process improvements
- » Service models
- » Policy frameworks
- » User journeys
- » Business models
- » Operational plans

Your presentation should clearly demonstrate the problem, solution, feasibility, impact and execution roadmap..

// HOW WILL YOU BE EVALUATED?

JUDGING CRITERIA

 FOR TECH-BASED PARTICIPANTS	WEIGHTAGE
 Presentation & Demo	5%
 Scalability & Sustainability	10%
 Impact on Higher Education / Governance	15%
 Prototype / MVP	20%
 Technical Feasibility	15%
 Problem Understanding	15%
 Innovation & Originality	20%

 FOR NON-TECH BASED PARTICIPANTS	WEIGHTAGE
 Presentation & Demo	20%
 Impact / Value	20%
 Feasibility & Scalability	10%
 UX / Design	5%
 Technical Implementation	5%
 Solution Quality	15%
 Innovation & Creativity	15%
 Problem Understanding	10%

Note: Each criterion will be scored out of 10.
Total score will be calculated as per the weightage.

IDEAS TODAY. IMPACT TOMORROW.
INNOVATE • BUILD • TRANSFORM

Submission Requirements & Selection Procedure

- Prepare & Submit: Develop a solution based on your selected theme/track and submit it online between 15–30 September.
- Semi-Finals: 15 Technical + 15 Non-Technical teams will be shortlisted for the Semi-Finals on 9 October.
- Finale: 5 Technical + 5 Non-Technical teams will advance from the Semi-Finals to the Finale.

// DAY-WISE SESSION PLAN

DAY 1 – KICK-OFF TO MORNING SESSION

*Big Ideas
Start Here!*

TIME	SESSION	DETAILS
08:00	 Check-in & Registration	ID + confirmation verification, team kits, workspace allotment.
09:00	 Opening Ceremony & Welcome Address	Introduction to the session and welcoming everyone.
09:30	 Keynote: Theme & Track Briefing	Briefing of the themes and track.
09:45	 Team Formation Session	Team formation details.
10:15	 Rules, Judging Criteria & SOP Walkthrough	Judging criteria, Mentoring process.
10:30 - 12:30	 Hackathon begins (Presentations)	Presentations by respective technical and non-technical teams in front of jury members.
12:30 - 13:30	 Lunch Break	—
13:30 - 15:30	 Hackathon Presentation Continues	Presentations by respective technical and non-technical teams in front of jury members.
15:30 - 16:30	 1 st Level Qualifier Deliberation and Announcement	First level of selections will be deliberated and announced. Only selected teams will move ahead to 2 nd round.
16:30 - 17:00	 Snack & Energizer Break	—
17:00 - 18:00	 Finale Round Briefing	Idea validation, briefing and discussion with the assigned track mentor with the finalists.
18:00	 Dispersal for DAY 1	—

// DAY-WISE SESSION PLAN

DAY 2 – MORNING SESSION TO FINALE

 TIME	 SESSION	 DETAILS
08:00	 Check-In	—
09:00	 Finale Round Presentation Begins	Final idea revamping and presentation in front of the jury team wise on the stage.
12:30	 Presentations Concludes	—
12:30 – 13:30	 Lunch Break	—
13:30 – 15:00	 Networking and Socializing	Teams/ individuals are open to network with fellow participants and visitors.
15:00 – 16:30	 Announcement of Winners & Valedictory Session	Declaring the winners, prize/certificate distribution, event conclusion and thank you note.
16:30 – 17:00	 Wrap-Up	—

EVENT AT A GLANCE

	EVENT	Idea & Innovation Hackathon 2026 – Powered By MPONLINE LIMITED
	DATE	09-10 October 2026
	DURATION	2 Days
	FORMAT	In-Person / On-Ground
	VENUE	SSR Global Skills Park, Hazrat Nizamuddin Colony, Sector B, Ayodhya Nagar, Bhopal

REGISTRATION & FEES

TEAM REGISTRATION

₹499

PER TEAM (2-4 Members)

INCLUDES:

- ✓ Entry into the hackathon competition
- ✓ Certificate of participation
- ✓ Prizes and awards
- ✓ Internship opportunities

VISITOR PASS

₹99

PER PERSON

INCLUDES:

- ✓ Access to event viewing areas
- ✓ Exposure to the live hackathon environment
- ✓ Networking and learning opportunities

INNOVATE • COLLABORATE • IMPACT
